(a) Fermat-quintic section: 3D projection

(X_1, X_2, X_3)

(b) Observations around projected patches

(X_1, X_2, X_3)

$$[-1 : z_1 : z_2 : 0 : 0], \qquad z_1^5 + z_2^5 = 1$$

A two-real-dimensional section, not the full six-real-dimensional Calabi-Yau space.

The sampling law is declared in parameter coordinates, not Calabi-Yau volume.
